

2023 to 2027 Departmental Sustainable Development Strategy

National Security and Intelligence Review Agency (NSIRA)

Introduction to the Departmental Sustainable Development Strategy (DSDS)

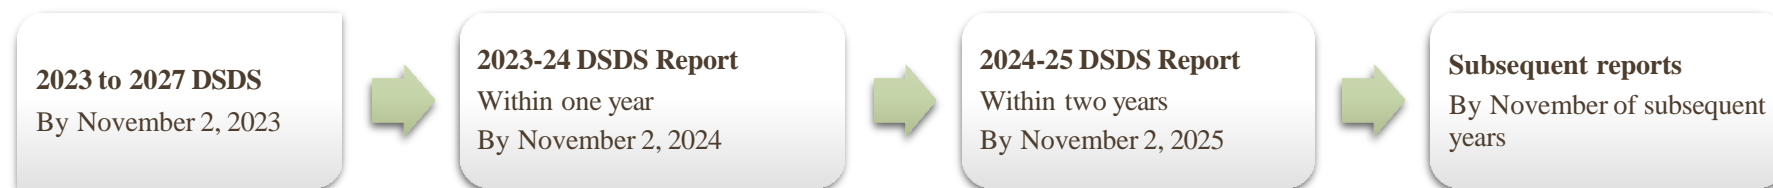

The Departmental Sustainable Development Strategy (DSDS) describes the specific actions we will take to advance goals, targets or implementation strategies in the [Federal Sustainable Development Strategy](#) (FSDS). It also sets out performance indicators, starting points, and targets that we will use to report on results.

Federal Sustainable Development Strategy

- makes decision making related to sustainable development **more transparent and subject to accountability** to Parliament
- **promotes coordinated action** across the Government of Canada to advance sustainable development
- respects Canada's **domestic and international obligations** relating to sustainable development, with a view to improving the quality of life of Canadians
- supports Canada's efforts to advance the 17 **Sustainable Development Goals** (SDGs) of the United Nations 2030 Agenda for Sustainable Development.
- (Legal framework is the Federal Sustainable Development Act)

What it means to NSIRA

- Recent changes to the Federal Sustainable Development Act, 2020, mean that it now applies to many more organizations, including NSIRA
- On November 2, 2022, the 2022 to 2026 Federal Sustainable Development Strategy (FSDS) was tabled in Parliament.
- To ensure compliance with the Act, **we must develop and table our 2023 to 2027 DSDS in Parliament on or before November 2, 2023.**
- **We must also report on our DSDS once in each of the two years** after it is tabled (which must also be tabled).
- Updates to DSDS content (e.g., to introduce new or revised actions, performance indicators, etc.) may be done through a DSDS update process that can be aligned with Departmental Plan development.
